ENERGY STAR® Ratings ONLY applicable in the United States

The information below is self explanatory and is provided to anyone considering a Metro Energy Star® color for roofing in Canada.

On NRCan's website (www.energystar.nrcan.gc.ca) is the following policy statement:

Roofing Products are NOT included in Canada's ENERGY STAR program. Natural Resources Canada (NRCan) works closely with the U.S. Environmental Protection Agency (EPA) to harmonize product specifications and promote consistency between the ENERGY STAR programs in Canada and the United States. Nevertheless, differences in program approaches do exist, occasionally resulting in differences between the types of products and activities supported by the program in the two countries. There may be limited applications where certain roofing products would provide energy savings in specific locations in Canada. As Canada is predominantly considered to have a "heating climate", however, the benefits of ENERGY STAR qualified roofing would not be generally applicable throughout the country.

ENERGY STAR® is only valid in the United States.
