NEW Tile-In Metal flashing

Metro's SMART-Design philosophy for its accessory flashings now extends to the flat roof transition. This new Metro accessory provides a flat roof 'Tie-In Metal' flashing, designed to securely flash the transition between a flat roof and a sloped Metro roof.

This new part is designed to be used in conjunction with Metro's 'Shake-Tile V-Bat Riser' or 'V-Bat Bird-Stop Riser' metal flashing as shown above and on the attached architectural drawing. The unique Metro 'locator-lip' design ensures a weather-tight detail at the pitch transition along with a 1/4" drip edge for a sealant bead to applied where it meets the flat roof.

The 'Tie-In Metal' flashing in standard stone-coat colors will be in production during June-July 2007.

The new part number is noted below.

ITEM X LENGTH	PN-# - XX = Color	INVOICE INFO
NEW 'Tie-In Metal' flashing X 79" long	3126-XX	'Tie-In Metal'
